

Armor Rupture Disc®

Protect Your “Assets”

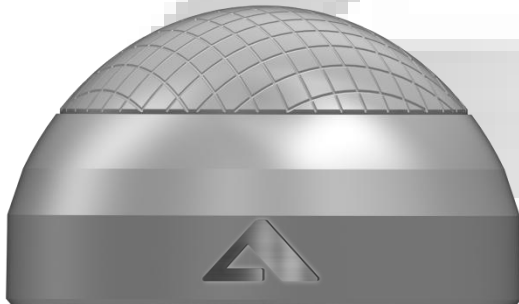

The Patented Rupture Disc® is exclusive to Armor Tools Intl. Inc.

Our Rupture Disc® is designed and engineered to answer the industries need for a full bore ID pressure control barrier. The design eliminates the inconsistent “shark tooth” result seen in other products. This “shark tooth” protrusion can cause damage to swab cups, plug profile packing and more.

One of the many important features designed into the Rupture Disc® is a controlled shatter pattern that leaves miniscule debris in the well bore unlike other products that leave larger inconsistent chunks of ceramic.

Patent No. CA2863603 C

Features & Benefits

- ✓ Full Bore ID separation groove
- ✓ Shatter Pattern
- ✓ Available in 5k, 10k, & 15K
- ✓ Ideal in Horizontal applications
- ✓ Hydrocarbon compatible
- ✓ Sour service Compliant
- ✓ Temperature rating of 1600c
- ✓ Superior up to date propriotor ceramic technology creates a durable and predictable pressure control device
- ✓ Controlled debris sizes allows the Rupture Disc® to be used in wells with downhole pumps and screens.
- ✓ ISO Compliant
